EDUCATION

Western University

Sept. 2021 – Apr. 2026

Specialization in **Computer Science**

- Member of **Western AI**, **Western CS Undergraduate Society** and Events Assistant at Western Sneaker Club.

Relevant Courses: Machine Learning, Databases, Statistical Programming, Unstructured Data, Operating Systems, Data Structures and Algorithms

PROFESSIONAL EXPERIENCES

Data & Machine Learning Intern

Sept. 2025 – Apr. 2026

HEAL

- Engineered an automated data pipeline integrating the **Google Places API** to track neighborhood substance store activity, detecting spatial anomalies and ensuring cross-source dataset integrity.
- Developed robust data standardization workflows utilizing **Python (pandas, NumPy, regex)** to sanitize unstructured address data, significantly reducing data inconsistencies for downstream analytics.
- Designed version-controlled storage architectures with rigorous schema validation, establishing data governance protocols that minimized errors and guaranteed long-term reliability.
- Applied advanced **machine learning models**, including clustering and time-series forecasting, to analyze retail density trends, delivering actionable data visualizations via **Matplotlib/Seaborn**.

Data Science Intern

Sept. 2024 – Aug. 2025

interRAI

- Managed the data preparation lifecycle for large-scale clinical datasets using **SAS**, optimizing data validation processes to ensure high-fidelity inputs for health research.
- Modernized data processing by engineering automated workflows with **SAS SQL** and macros, reducing manual overhead and accelerating execution runtimes by approximately **30%**.
- Spearheaded a comprehensive technical training initiative, documenting core SAS architectures to accelerate onboarding and enhance cross-functional team efficiency.
- Delivered interactive, publication-ready analytical dashboards utilizing **Power BI** and **R Markdown**, directly supporting the publication of multiple peer-reviewed clinical studies.

Front End Developer Intern

May 2024 – Aug. 2024

BERL

- Architected optimized front-end components by refactoring **HTML/CSS** and extending **Cascade CMS** templates, reducing latency and streamlining content delivery.
- Engineered highly responsive web layouts utilizing **CSS Flexbox/Grid** and **Adobe Photoshop**, optimizing administrative screens by consolidating control interfaces into streamlined, single-line formats.
- Enforced strict accessibility and code quality standards through rigorous component inspections and peer coaching, ensuring consistent, high-performance UI deployments.

Software Developer Intern

Sept 2023 – Apr. 2024

Cultureplex

- Engineered custom **Python (pandas, NumPy)** and **SQL**-based analytical frameworks to process complex cultural datasets, accelerating digital humanities research and data extraction.
- Optimized **MySQL** database architecture through advanced schema normalization, strategic indexing, and query tuning, significantly reducing data retrieval latency.
- Developed robust **ETL pipelines** leveraging Python and regular expressions to transform unstructured text, while managing task schedules to facilitate seamless tool adoption by research teams.
- Generated high-impact data visualizations using **Matplotlib/Seaborn**, providing researchers with clear, structured datasets via **Excel/CSV** to accelerate timely academic publications.

PROJECTS | [View All](#)

Spellchecker Application | *Java, Java Swing*

- Developed a standalone **Java Swing** desktop application for **spellchecking text documents**; implemented file handling and integrated a **Trie data structure** for efficient word storage and fast lookups.
- Collaborated on project specifications and optimized **UI/UX design** to deliver a user-focused, high-performing solution with reliable text processing and responsive error detection.

TECHNICAL SKILLS & CERTIFICATIONS

Data Science & ML: Python, R, PyTorch, TensorFlow, Scikit-Learn, XGBoost, Generative Language Models, Pandas, NumPy, Polars, SciPy, PySpark, Matplotlib, Seaborn, SHAP, UMAP, Yellowbrick, Jupyter

Languages & Web: Java, C, C++, C#, Bash, PHP, HTML/CSS, XML, Django, .NET, React

Cloud, Data & DevOps: AWS, Azure, Google Cloud, Docker, Git, Maven, Elasticsearch, Lucene, MapReduce, Regex, Excel, CSV, Claude Code

Databases: MySQL, DynamoDB, Snowflake, Hadoop, Firebase, MongoDB, SQLite, PostgreSQL, MSSQL

- AWS Machine Learning Engineer Certificate** - In Progress
- Meta Backend Developer Specialization Certificate**
